Small flat blade screwdriver, automotive grade masking tape, razor blade or X-Acto knife, 9mm or 11/32" socket and ratchet, black paint, mild solvent, glass cleaner or alcohol and soft clean cloths.

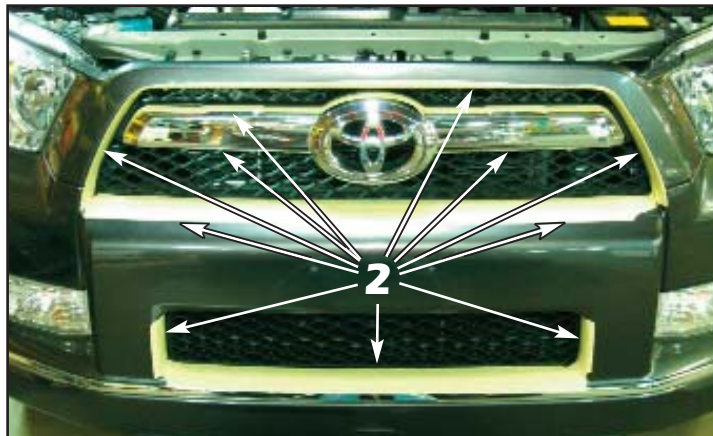

D 20 H1 P

### Notes to the Technician/Installer:

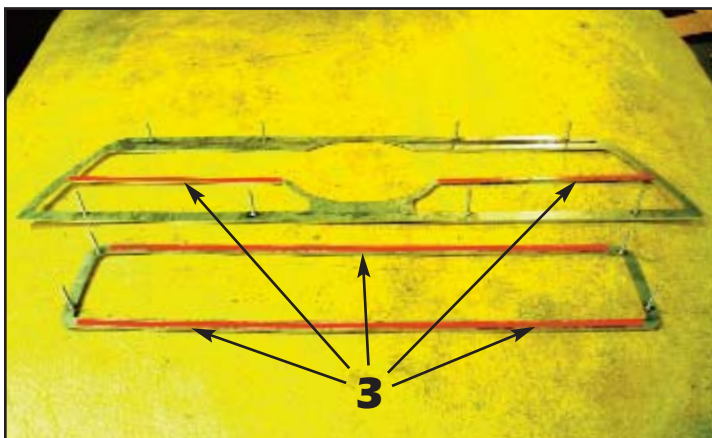

E&G is proud to present this package to you and reminds you that for technical information, contact technical assistance at 410-381-4900. Do not attempt the installation of any E&G product without first reading the detailed instructions. E&G Classics will not warrant damaged parts or the vehicle due to altered installation instructions.

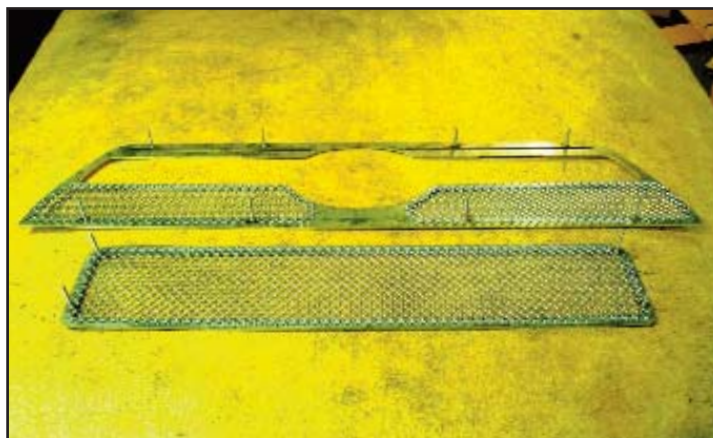

1. Open the hood and remove the 13 factory plastic push pins securing the radiator support panel cover and remove the cover from the vehicle.

2. Apply protective masking tape around the upper and lower factory grille openings, as well as around the chrome bar in the upper grille.

3. Thoroughly clean the back of the E&G grille surrounds. Install the supplied .045" x .250" double faced tape onto the back of the upper and lower grille surrounds (where shown).

4. Peel off the backing from the double faced tape, align the mesh sections into place and press them firmly into the double faced tape.

5. Peel back one corner of the protective coating on the lower stainless steel surround then align the lower grille into place, making sure that the studs pass through the openings in the factory grille. Install the supplied large black plastic washers and #8-32 ESNA half nuts onto each stud and hand tighten at this time.

6. Remove the protective masking tape from around the lower grille only at this time. You will be able to shift the mesh grille around to prevent the tape from breaking and getting caught behind the mesh grille.

7. Once the masking tape has been removed, use a 9mm or 11/32" socket to tighten the #8-32 ESNA half nuts until the washers no longer rotate. **DO NOT OVERTIGHTEN** or you could indent the stainless steel surround at the stud locations.

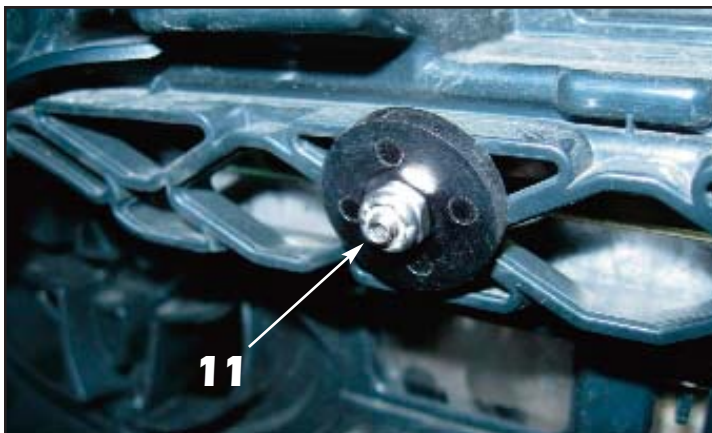

8. Prior to upper grille installation, apply black paint to the upper grille's lower studs to help conceal them once the grille is installed.

9. Peel back one corner of the protective coating on the lower stainless steel surround, then align the upper mesh grille into place making sure the studs pass through the factory openings in the grille.

10. Install the supplied upper grille lower mounting brackets, part number 1073-0159-10 and secure them using the supplied #8-32 ESNA half nuts but do not tighten completely at this time.

11. Install the supplied large black plastic washers and #8-32 ESNA half nuts onto the upper grille's upper mounting studs but do not tighten completely at this time.

12. Once the protective masking tape has been removed, tighten the #8-32 ESNA half nuts until the washers no longer rotate. DO NOT OVERTIGHTEN or you could indent the stainless steel surround at the stud locations.

13. Reinstall the radiator support panel bracket back onto the vehicle. Peel off the protective coating from the upper and lower surrounds and use a mild solvent and a soft, clean cloth to remove any glue residue. Use alcohol or glass cleaner and a soft, clean cloth to remove any solvent residue.

### Fine Mesh Part #1129-0102-10

Quantity:	Description:	Part Number:
1	Upper Mesh Grille Surround	1129-0034-10
2	Upper Mesh Sections	1129-0020-10
1	Lower Mesh Grille Surround	1129-0022-00
1	Lower Mesh Section	1129-0021-00
1	Installation Hardware Kit	1129-1902-10
4	Upper Grille Lower Brackets	1073-0159-10
8	Large Black Plastic Washers	1999-0264-00
12	#8-32 ESNA Half Nuts	1999-0065-00
