GUIDE TO THE RATINGS

Overall score emphasizes safety-related tests, including braking, handling, and resistance to hydroplaning. Displayed scores are rounded; models are listed in order of precise overall score. **Dry braking** was from 60 mph, and wet braking was from 40 mph with the antilock brake system engaged. **Handling** includes how well the tires gripped in an avoidance maneuver involving a swerve into the left lane and back into the right lane; wet and dry cornering grip on our skid pad; and subjective steering feel. **Hydroplaning** reflects how

quickly we could drive through standing water before the tires began to skim on the surface. **Snow traction** reflects the distance our test car needed to accelerate from 5 to 20 mph on moderately packed snow. We tested **ice braking** on a skating rink from 10 mph with the ABS disengaged. **Rolling resistance**, measured on a dynamometer at an outside laboratory, is a factor in fuel economy. **Ride comfort** and **noise** reflect our on-road judgments. **Tread life** is an indicator of wear potential from CR's 16,000-mile mixed driving test. **Price we paid** is retail for the (P)265/70R17 size tested. Overall scores and Ratings are relative to tire category.
