

AUX Connection Portion

2005 Toyota 4Runner – Sports-Edition V8
Project: iPhone / iPod & MP3 (external audio accessories) Integration.

Project Goal:

- 1) Simple interface between my car stereo & the external audio accessories.
- 2) Clean Wire harnesses & module installation
 I.e. within the Center Console etc.
- 3) External audio accessories to be connected through a USB/AUX Dash/Console Mount ... see example.

Goal is NOT:

Cables to connect to the external audio accessories coming out of the Glove compartment and or through a hole elsewhere.

= Components do not require modifications

Items 2₁ & 2₂ = Standard GTA Car Kit Hardware

Item 2₃ = Standard Female 30-pin To Male USB Cable For iPhone
